B. NURSING SERVICES AND NURSING EDUCATION

Modern nursing is a dynamic, therapeutic and educative process meeting the health needs of the individual, family and the society in the prevention of diseases and the promotion of health. Nursing has earned its present role in society through the hard work and vision of countless men and women within the profession and outside.

Nursing services in EHA have a unique place in total health care. Good nurses cannot be trained without a good program of nursing education. EHA has six Nursing Schools providing excellent nursing education for young men and women. In EHA schools, nursing students learn and become proficient not only in the clinical aspects of nursing care, but also learn to provide such care in a spirit-led way to sustain the patient's emotional and spiritual health as well as their physical well-being. Nurses who graduate from this whole-person care training in EHA Nursing Schools are serving dynamically in various capacities in India and abroad.
